DETAILED ACTION

Response to Amendment

1. The examiner acknowledges the applicant submission of the amendment dated 5/4/2007. At this point, claims 1-4 have been amended, claim 5 has been canceled. Thus claims 1-4 are pending in the instant application.

Response to Arguments

2. Applicant's arguments with respect to claim 4 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 4 is rejected under 35 U.S.C. 102(b) as being anticipated by Kobashi et al. (US 5,005,107).

Regarding claim 4, Kobashi et al. disclose a solid electrolytic capacitor (figures 1-2) comprising:

- a capacitor element (100) including a porous anode chip body (12) which is a sintered body of valve-acting metal powder, a dielectric film (13) formed on the anode chip body other than a one end surface thereof from which no anode wire projects, a solid electrolyte layer (14) formed on the dielectric film other than the one end surface, and a cathode-side

Art Unit: 2831

electrode film (16) formed on the solid electrolyte layer other than the one end surface;

- an anode-side terminal (17) electrically connected to the metal powder exposed on said one end surface of the anode chip body; and
- a cathode-side terminal (18) is provided on the cathode side electrode film.

Allowable Subject Matter

5. Claims 1-3 are allowed.

The following is an examiner's statement of reasons for allowance:

With respect to claims 1-3, the prior art alone or in combination does not teach the limitation of a method for manufacturing a capacitor element for a solid electrolytic capacitor comprising the steps of: adhesively attaching one end surface of the anode chip body to the surface of a metal plate with an electrically conductive adhesive, so that the anode chip body can be peeled off from the metal plate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

Art Unit: 2831

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
